How to Check Your Computer's Specifications

Operating System:	Right click the My Computer icon; choose Properties from the dropdown menu; will be displayed under the General tab, under the System heading.
CPU:	Right click the My Computer icon; choose Properties from the dropdown menu; will be displayed under the General tab, under the Computer heading.
RAM:	Right click the My Computer icon; choose Properties from the dropdown menu; will be displayed under the General tab, under the Computer heading.
Hard Drive:	From the desktop, double-click the My Computer icon; left-click once on the "C" drive to display available storage space.
Video Card:	Right-click on desktop and choose Properties; left-click the Settings tab to display the color and screen area.
Browser Version:	Open Internet Explorer; from the toolbar, click Help to open your drop down menu. Scroll down to "About Internet Explorer" and click on it. This will produce a pop-up window with the information
Internet Speed:	To check your internet speeds, go to http://www.speakeasy.net/speedtest/ to test both your download and upload speeds. The key indicator for the PACS application is the download speed.

Note: The PACS application can be installed on a Macintosh utilizing Parallels or BootCamp.
